

# RML Example 7: Frames

RML (Report Markup Language) is ReportLab's own language for specifying the appearance of a printed page, which is converted into PDF by the utility rml2pdf.

These RML samples showcase techniques and features for generating various types of output and are distributed within our commercial package as test cases. Each should be self explanatory and stand alone.

---

## ***This is frame 1***

**This page tests to see that multiple frames display on one page. It also checks to see that the "nextFrame" tag works correctly to split the text in the story correctly between those frames.**
