

RML Example 43: Longdoc

RML (Report Markup Language) is ReportLab's own language for specifying the appearance of a printed page, which is converted into PDF by the utility rml2pdf.

These RML samples showcase techniques and features for generating various types of output and are distributed within our commercial package as test cases. Each should be self explanatory and stand alone.

Examples of long document features

This test case is here to try out various features commonly found in a multi-chapter brochure of catalog.

RML Example 43: Longdoc

This page has an undefined colour and chapter name.

The secret 'grey' chapter

RML Example 43: Longdoc

The red chapter

This is on page 3. The template should be red, but that's variable.

The Red Chapter

RML Example 43: Longdoc

More stuff in the red chapter. This should be indexed under 'red'.

The Red Chapter

RML Example 43: Longdoc

The green chapter

The template should be green, but that's variable.

The Green Chapter

RML Example 43: Longdoc

More stuff in the green chapter.

The Green Chapter

RML Example 43: Longdoc

The blue chapter

The template should be blue, but that's variable.

The Blue Chapter

RML Example 43: Longdoc

More stuff in the blue chapter.

The Blue Chapter
