

RML Example 23: Oas

RML (Report Markup Language) is ReportLab's own language for specifying the appearance of a printed page, which is converted into PDF by the utility rml2pdf.

These RML samples showcase techniques and features for generating various types of output and are distributed within our commercial package as test cases. Each should be self explanatory and stand alone.

Overlap Attached Space tests (define please!)

This page tests out a number of attributes of the **paraStyle** tag. This paragraph is in a style we have called "style1". It should be a normal paragraph, set in Courier 12 pt. It should be a normal paragraph, set in Courier (not bold). It should be a normal paragraph, set in Courier 12 pt.

This paragraph is in a style we have called "style4". It should be have a space before it. It should be have a space before it of 2 centimeters. It should be have a space before it.

Paragraph 5: Space After

This paragraph is in a style we have called "style5". It should be have a space after it. It should be have a space after it of 2 centimeters. It should be have a space after it.

Paragraph 6: First Line Indent

This paragraph is in a style we have called "style6". It should be have an indented first line. It should be have an first line indented by 2 centimeters. It should be have an indented first line.

Paragraph 7: Leading

This paragraph is in a style we have called "style7". It should be using leading. It should have a gap of 5 points between each line. It should be using leading. It should have a gap of 5 pt between each line. It should be using leading. The gap between lines should be half of the height of a line. This paragraph should look like it has a line spacing of "1.5 lines"

Paragraphs 8-12: Simple Bullet Points

■ `Parastyle name="style8" parent="style1" bulletFontName = "ZapfDingbats" bulletFontSize = "5"`

- These paragraphs are in a style we have called "style8"
- These five lines should have bullet points.
- The bullet font is ZapfDingbats.
- The bullet size is 5 points
- This is a long line to see how multi-line bullets look: These paragraphs are in a style we have called "style8". These four lines should have bullet points. The bullet font is ZapfDingbats. The bullet size is 5 points

Paragraph 13-18: Indented Bullet Points

- `bulletFontName = "ZapfDingbats" bulletFontSize = "10" bulletIndent = "20"`
- These paragraphs are in a style we have called "style9"
- These five lines should have *indented* bullet points.
- Bullet points should look like a pointing hand.
- Bullet font is still ZapfDingbats, and bullet size is 10 points.
- The bullet indent is 20 points
- This is a long line to see how multi-line bullets look: These paragraphs are in a style we have called "style9". These four lines should have *indented* bullet points. Bullet points should look like a pointing hand. Bullet font is still ZapfDingbats, and bullet size is 10 points. The bullet indent is 20 points

Paragraph 19-24: Indented Bullet Points with a Left Indent for the Text

- `bulletFontName = "ZapfDingbats" bulletFontSize = "10" bulletIndent = "20" leftIndent = "35"`
- These paragraphs are in a style we have called "style10"
- These four lines should have *indented* bullet points, with the text indented as well.
- Bullet points should look like a pointing hand.
- Bullet font is still ZapfDingbats, and bullet size is 10 points.
- The bullet indent is 20 points, and the text indent is 35 points
- This is a long line to see how multi-line bullets look: These paragraphs are in a style we have called "style10". These four lines should have *indented* bullet points, with the text indented as well. Bullet points should look like a pointing hand. Bullet font is still ZapfDingbats, and bullet size is 10 points.

Paragraph 25: Left Justified Paragraphs

This paragraph is in a style we have called "style11". It should be left justified. It has an argument which states '`alignment = "left"`'. It should be left justified. It should be aligned to the left.

Paragraph 26: Right Justified Paragraphs

This paragraph is in a style we have called "style12". It should be right justified. It has an argument which states '`alignment = "right"`'. It should be right justified. It should be aligned to the right.

Paragraph 27: Centered Paragraphs

This paragraph is in a style we have called "style13". It should be center justified. It has an argument which states '`alignment = "center"`'. It should be centered. It should be aligned to the center.

Paragraph 28: Justified Paragraphs

This paragraph is in a style we have called "style14". It should be justified. It has an argument which states '`alignment = "justify"`'. It should be justified.

RML Example 23: Oas

Paragraphs 29-32: Bullets using left align, right align, centered and justify.

- `bulletFontName = "ZapfDingbats" bulletFontSize = "5" bulletIndent = "20" leftIndent = "35" alignment = "left"`
- This is "style15", bullets with a left alignment. (The bullets in this style are based on "style10")
- `bulletFontName = "ZapfDingbats" bulletFontSize = "5" bulletIndent = "20" leftIndent = "35" alignment = "right"`
- This is "style16", bullets with a right alignment. (The bullets in this style are based on "style10")
- `bulletFontName = "ZapfDingbats" bulletFontSize = "5" bulletIndent = "20" leftIndent = "35" alignment = "center"`
- This is "style17", bullets with a center alignment. (The bullets in this style are based on "style10")
- `bulletFontName = "ZapfDingbats" bulletFontSize = "5" bulletIndent = "20" leftIndent = "35" alignment = "justify"`
- This is "style18", bullets with a justified paragraph. (The bullets in this style are based on "style10")

These all look wierd, but most people do not actually use these styles because they look so wrong.

Paragraph 33-35: Using Colours by Colour Name

This text should be RED

This text should be GREEN

This text should be BLUE

You SHOULD be able to specify colours by all the means available to `reportlab.lib.colors`. Currently, you cannot use RGB or HEX values...

Last Paragraph: Para Tags and Paragraph Content

This should *not* have any extra spaces at the start of **this** line (though there should be at the start of the heading). RML should ignore additional whitespace, and you should be able to format the actual paragraphs as you like. The text in this paragraph starts on a different line to the actual "para" tag.

Quoting and escaping

This checks for all the possible quotes: `&` = `&`, `<` = `<`, `>` = `>`, `'` = `'`, `"` = `"`, `£` = `£`.

If this is not italic, and this is not bold, even normal angle brackets are broken.

This paragraph should be in a bordered box with a red outline and gently curving corners. If it is not I will attack my colleague who suggested this could be done

RML Example 23: Oas

easily.

This paragraph should be in a bordered box with a blue outline and sharp corners and no padding. If it is not I will attack my colleague who suggested this could be done easily.
