RML Example 20: Relativeframes

RML (Report Markup Language) is ReportLab's own language for specifying the appearance of a printed page, which is converted into PDF by the utility rml2pdf.

These RML samples showcase techniques and features for generating various types of ouput and are distributed within our commercial package as test cases. Each should be self explanatory and stand alone.

This is frame 1

This document illustrates the use of the percent (%) specifier for frame dimensions. The page should be divided into four frames, each taking up a quarter of the page. This frame has a 5% border around it. This page is LETTER size

This is frame 2

This is frame 3

This is frame 4

This is frame 1

This page is A4 size. It has the same frame specification as the previous page.
